

O O P S

IS THIS THE FUTURE YOU HOPED FOR ?

Do you trust our government to put the interests of the country before the interests of its party?

A year and a half after the referendum, everything has changed. We know a lot more now than we did when we voted.

Is this what we voted for?

Mass exodus of foreign staff from NHS

High levels of inflation

Jobs to move abroad

End of Open Skies Agreement, end of cheap flights

Collapse of £ making everything we import more expensive

Agriculture at risk from loss of markets and departing foreign workers

“ I voted for an extra £350m per week for the NHS, not fewer doctors and nurses, and longer waiting lists.”

Since June 2016 more than 10,000 doctors, nurses and support staff from continental Europe have left the NHS and returned to their homes in the European Union.

47% think Brexit is wrong for Britain versus 42% in favour of leaving.

YouGov Poll, October 2017

66% disapprove of the government's conduct of the negotiations.

ORB Poll for Daily Telegraph, November 2017

IT'S NOT TOO LATE

Now that we know more about the risks and consequences of Brexit, it's OK to change our minds. And it's not too late.

Brexit can be reversed says author of Article 50

“We are not required to withdraw just because Mrs May sent her letter. Actually, the country still has a free choice about whether to proceed. As new facts emerge, people are entitled to take a different view, and there's nothing in Article 50 to stop them.”

“I think the British people have the right to know this - they should not be misled.”

Lord Kerr, Architect of Article 50. (Sky News, November 10, 2017)

“For the first time in over a year an opinion tracker has found that more people believe the UK will be worse off as a result of the vote to leave than better, amid fears that key talks have stalled.”

Daily Telegraph, November 7, 2017

**For our children's future,
For our community's future,
For our country's future, it's
Time to reflect,
Time for a rethink,
Time to reconsider.**
